

Simple, Affordable, and Impactful Asset Visibility with SynSaber

Challenges:

- ⊗ Limited Asset Visibility in OT Environments
- ⊗ Legacy System Compatibility and Performance Concerns
- ⊗ Outdated Inventory and Compliance Hurdles
- ⊗ Integration and Adoption into Existing Systems

Solutions:

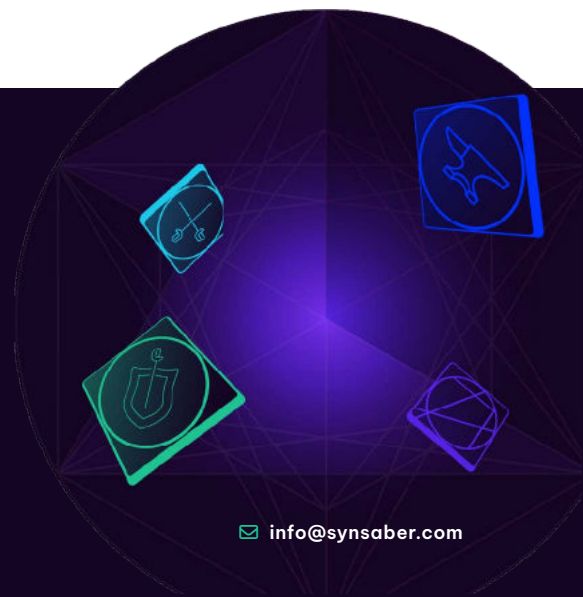

- ✔ Deploy SynSaber's software sensors, Sabers, **rapidly, flexibly, and seamlessly** across any network, including air-gapped or connectivity-limited environments, to streamline **asset identification, inventory management, and compliance**.
- ✔ **Purpose-built** asset identification solution for industrial environments deployed at the **edge** without impacting device performance, even in legacy systems.
- ✔ Sabers provide **comprehensive asset insight**, removing blind spots and enabling real-time anomaly detection.
- ✔ **Seamless integration** with your existing tools and workflows, eliminating adoption challenges.

SynSaber Impact:

- ⚙️ **Seamlessly integrate** with existing workflows for rapid visibility and insight.
- 📊 Empower teams with **contextual data** for informed decisions.
- 🔗 Enhance operational **awareness** across your organization.
- 📋 **Simplify compliance** reporting with **real-time** asset monitoring.
- 👤 Minimize disruption to normal operations and **maximize productivity**.

About SynSaber:

- Founded in 2020
- Exclusive dedication to OT/ICS
- Supported by top cyber investment firms
- Fully software-based
- Vendor-agnostic & integration focused
- We fight to empower industrial operators with knowledge and visibility
- Enrich existing industrial operations across the organization

SynSaber's Asset Identification Features

Automated Asset Data Gathering

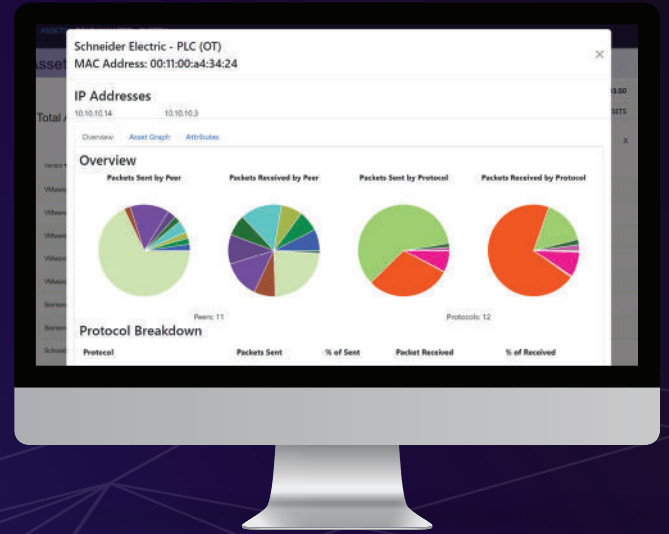

- Sabers gather and analyze asset data to curate relevant information.
- Reduce manual asset identification and discovery with continuous asset monitoring.
- Automatically update your asset inventory with detailed data profiles directly from Sabers.

Continuous Asset & Network Monitoring

- Quickly see and monitor changes or updates to current assets.
- Identify and flag any new assets when they appear on the network.
- Reduce or eliminate manual updates to asset profiles with data pulled automatically from Saber.

Integrate & Import Data

- Easily incorporate Saber information into tools and workflows, regardless of vendor.
- Consolidate asset data from multiple sources using the import function.
- Enrich existing workflows and asset profiles with processed data from Sabers.

“At SynSaber, we’re driven by the mission to transform how industrial environments safeguard their assets. Our software solutions bridge the gap between IT and OT, ensuring unparalleled visibility, safety, and security. We’re committed to empowering organizations to protect what matters most.”

– Jori VanAntwerp, CEO & Co-founder, SynSaber
