

See, Know, and Defend Your Industrial Environment

INDUSTRIAL ASSET AND NETWORK MONITORING SOLUTION

The technologies that make our utilities, energy and manufacturing facilities work are more vulnerable than ever to cyber attacks. SynSaber is the industrial asset and network monitoring solution that provides continuous insight into status, vulnerabilities, and threats, enabling operators to more effectively see, know, and take action to defend industrial systems and protect critical infrastructure.

Why SynSaber

SynSaber is the scalable, future-proof solution that puts the control back into the operator's hands, helping detect threats at-speed and defend in real-time – whether on-prem or in the cloud.

LOW-HARDWARE, LOW-HASSLE

SynSaber sensors are low-hardware, high-value and designed to be deployed at-scale and at-speed.

LOCALIZED DATA COLLECTION MADE EASY

Aggregate and fuse data from any source to see the full picture and glean actionable insights.

TOTAL VISIBILITY & CONTINUOUS INSIGHT

Place sensors anywhere to uncover blind spots and get near real-time visibility.

INTUITIVE FLEET MANAGEMENT

Increase efficiency with an intuitive interface designed with the operator in mind.

SCALABLE & FUTURE-PROOF

SynSaber is technology-agnostic and integrates seamlessly with any tech stack and existing investments.

VISUALIZE RULES & CONFIGURATION

Easily see, shape and tune SynSaber to best protect your network like only you know how.

How it Works

SynSaber integrates with your existing investments right out of the box and can be deployed on-site or in the cloud. With our quick and easy deployment model, operators automatically get access to the security dashboard, customer support, and every product improvement made over time. Our goal is to empower you with a simple and effective solution that scales and deploys at the push of a button.

Who We Empower

We leverage decades of industrial security experience to help industrial operators, engineers, and defenders better understand the threats to their operational technologies (OT), networks, and industrial control systems (ICS).

ENERGY

Protect the critical energy infrastructure that keeps our nation running

UTILITIES

Defend the essential services that citizens rely on each day

MANUFACTURING

Stay ahead of complex threats to protect IP and other sensitive data

INDUSTRIAL IOT

Secure your growing list of connected devices and networks

Become a Partner
